# Tatiana Karamorina

FRONTEND DEVELOPER

## Profile

Frontend developer with 2.5 years of experience, leveraging an 8-year background in QA engineering. Proficient in React. Thrives in startup and small-team environments, collaborating effectively to deliver top-notch solutions. Quick learner with a keen eye for visual perfection.

## Employment History

### Frontend Developer, Util, London, UK

AUGUST 2022 — DECEMBER 2023

**Project:** application focused on evaluating the ESG impact of companies through the lens of the UN SDGs

- Performed the full cycle of application development (React, TypeScript), from setting up microfrontend architecture, establishing CI processes and effective testing strategy (Cypress) to first app release to production
- Implemented new features with focus on visualising complex datasets
- Created custom charts to enhance UX by simplifying comprehension of intricate data
- Ensured application quality and compliance to accessibility standards
- Spearheaded design and development of mobile version of the app
- Contributed to flawless production operations through well organised release process, application monitoring, and feature flags utilisation
- Actively participated in feature design sessions to drive project success
- Developed a custom UI library, significantly enhancing developer productivity and fostering code reuse

### Frontend Developer, Ondat, London, UK

JUNE 2022 — JULY 2022

**Project:** portal for monitoring and configuring Kubernetes clusters

- Implemented new features according to Figma designs using React
- Committed efforts to enhance code quality, resulting in improved code structure, better readability, and a notable 15% increase in test coverage
- Added responsive design support to core pages, encouraged the team to adopt mobile-first approach

### Frontend Developer, Scandiweb, Riga, Latvia

FEBRUARY 2021 — JANUARY 2022

**Project:** complex highly customizable e-commerce solution

- Developed complex UI components with custom animations using React
- Played key role in portal redesign, introduced RTL support
- Enhanced application quality by addressing bugs, bolstering accessibility, performance, SEO, and improving lighthouse scores

### QA Engineer, Minsk, Belarus

JULY 2012 — AUGUST 2020

Ensured application quality by performing manual, automated, and performance testing. Worked across diverse domains such as e-commerce and online gaming. Conducted a wide scope of QA activities, ranging from functional testing of user interfaces to assessing data quality and validating ETL processes.
